

**AEREON**

CREATING A CLEANER PLANET

CASE STUDY #170104

**CEB 800 CA
ENCLOSED FLARE SYSTEM**

PROJECT DETAILS

Location:	Oxnard, CA
Flow Rate:	25.7MMBTU/HR
Inlet Pressure :	> 1 psig
Heating Value:	1220 BTU/SCF
INFO:	Oil Production Tank Vapors
INFO:	BACT required by AQMD
INFO:	Expansion to 39MMBTU/HR

Aereon's Certified Ultra Low Emissions Burner (CEB) technology is Best Available Control Technology (BACT) approved for Air Quality Management Districts (AQMD) throughout California. The Oil Company increased drilling and production exceeding their installed flare capacities and compliance requirements. Our CEB 800 CA exceeded all design parameters as well as current and future emission compliance.

AEREON NOx it out of the park again!
